SPRAYMAX · 12 S FILM · STORYBOARD V2

Ten shots.
Cold blue light.

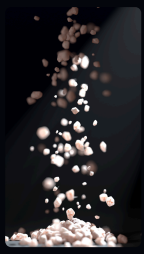

3D previews of each shot, with the real bottle and label. The film itself is made with Seedance 2.5 from your real bottle photos, so it will look like real footage, not 3D.

0:00 The collar

0:01 The splash

0:02 Himalayan salt

0:03 The smoke

0:04 In your hand

0:06 The mist

0:07 Sea-water beads

0:08 The sea

0:09 The lineup

0:10 Packshot

Macro · water splash · salt · smoke · first-person spray · beads · night sea · five-bottle lineup · packshot. Vertical 9:16, 1080×1920, 12 seconds.

01/10 0:00–0:01 MACRO

The collar

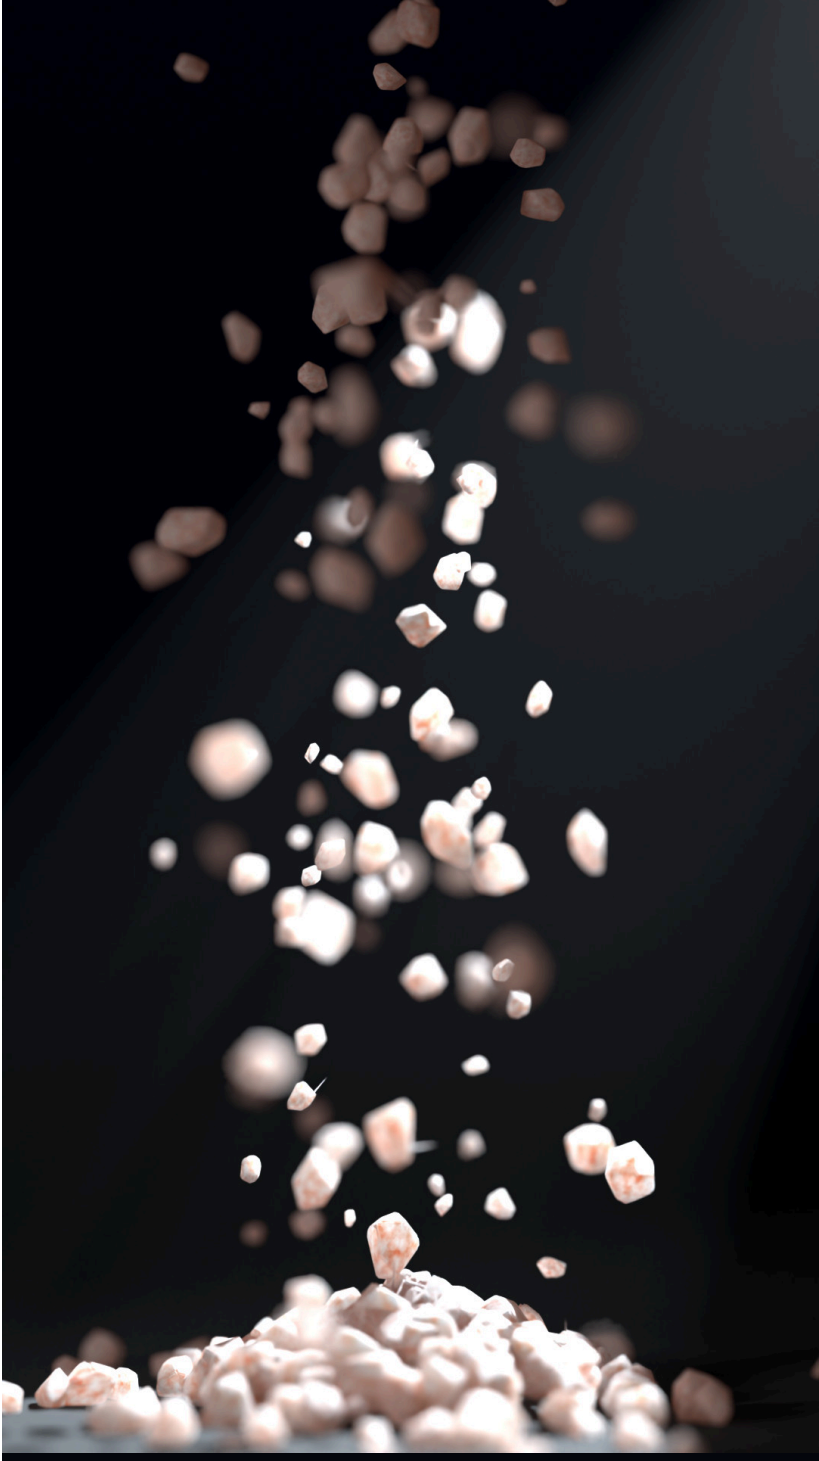

A hard white light sweeps across the ribbed collar, one rib at a time.

02/10 0:01–0:02 ELEMENTAL

The splash

Dark sea water erupts in a crown round the bottle, droplets flying in slow motion.

03/10 0:02–0:03 INGREDIENT

Himalayan salt

Pink Himalayan salt tumbles through one cold beam of light.

04/10 0:03–0:04 ELEMENTAL

The smoke

Cold smoke rolls in and curls round the bottle as the camera pushes in.

05/10 0:04–0:06 POV · USE

In your hand

First person: one press, and a fine mist settles on your open palm.

Preview made from your test video plus a 3D mist; in the film both hands are shown

06/10 0:06–0:07 MACRO

The mist

The mist bursts out of the nozzle, backlit ice blue. Mist, never liquid.

07/10 0:07–0:08 MACRO

Sea-water beads

Beads of sea water on the label; one runs down over the wordmark.

08/10 0:08–0:09 ELEMENTAL

The sea

A night swell rises toward the lens under a cold moon.

09/10 0:09–0:10 MULTI-PACK

The lineup

Five bottles step back into the dark, rim-lit, the front one sharp.

10/10 0:10–0:12 END CARD

Packshot

The bottle on deep blue, a long shadow, then the logo and BORN IN HIMACHAL.

TO START

Pick A or B.

RECOMMENDED

A · 720p, finished at 1080p **$3.78**

One Seedance 2.5 generation at 720p, upscaled to 1080×1920 in the finish. If a shot misses, I remake just that shot ($1.26 each). Two fixes still stay under $7.

B · native 1080p **$9.48**

Sharpest. Over the $7 budget, and one take only: no money left to fix a shot.

Nothing has been spent yet. After your pick I send the prompt, check every shot against your real bottle, fix what fails, then grade, add sound and the end card.
